Global Supply System and New Supplier Sourcing

Leveraging our Asia-centered global network, CBC ensures stable supply from existing suppliers while continuously researching and developing new ones

- Global procurement network: a supply network covering Japan, China, ASEAN, India and North America
- New supplier research: continuous identification and evaluation of new suppliers based on customer requirements
- Multi-source structure: securing second suppliers for key materials to spread supply risk
- Quality control: on-site audits of supplier factories, with quality assurance through third-party evaluation processes
- One-stop proposals: efficiency and cost optimization through consolidated procurement, from packaging materials to food ingredients
